

## LPN & CNA TRAINING

### LICENSED PRACTICAL NURSE (LPN) PROGRAM

The McGuire Group, in partnership with Erie 2-Chautauqua-Cattaraugus BOCES, offers a one-of-a-kind Licensed Practical Nurse (LPN) training program.

The 13-month program is taught by BOCES instructors and includes lectures from experts at The McGuire Group facilities. Classes are held at Chapel Villa Park in Derby with clinicals being completed at AutumnView Health Care Facility in Hamburg, TLC Hospital in Lakeshore and Brooks Memorial Hospital in Dunkirk.

This program is offered free to CNA's who have been employed with The McGuire Group for at least one year. They must pass an entrance exam, complete a personal interview and demonstrate a commitment to long-term care before acceptance is granted into the program. Upon graduation, students are required to pass the board exam before receiving their license.

### CERTIFIED NURSING ASSISTANT (CNA) PROGRAM

Each year, nearly 300 trainees graduate from our CNA training program at The McGuire Career Center located at 560 Delaware Avenue in Buffalo.

The **COMPREHENSIVE TRAINING PROGRAM** encompasses four months of classroom, clinical and hands-on training. Participants will then be eligible to sit for the New York State administered exam to receive their certification.
