Results-Driven Rehab

To meet the unique needs of our patients, Brookhaven Health Care Facility features a unit designed specifically for full-scale Subacute and orthopedic rehabilitation and recovery. Our experience in the Subacute arena spans nearly 20 years, with thousands of patients receiving the high quality, individualized care that has earned us our reputation for excellence. While staying with us, you will be cared for by physicians, registered nurses and rehabilitation personnel who specialize in physical medicine, rehabilitation and complex medical conditions.

Rehabilitation Services Include:

- Physical and Occupational Therapy, with frequency tailored to individual needs
- Activities of Daily Living Training
- Simulated Work Exercise
- Stair, Ramp and Curb Training
- Automobile Transfer Training
- Pain Management
- Intravenous Antibiotics
- Electrical Stimulation for Wound Healing

Specialized Programs

CARDIAC CARE - Our program includes in-room, real-time, cardiovascular diagnostic monitoring and cardiac rhythm device monitoring.

NEUROLOGIC REHABILITATION - This program helps patients recover the mental and/or physical functioning that has been affected by neurological conditions.

ORTHOPEDIC REHABILITATION - Designed for patients who have had orthopedic surgery, total joint replacement or an injury to the back, arms or legs.

POST-SURGICAL MANAGEMENT - This service encompasses intravenous medications, wound care, nutritional support, skilled nursing and physical therapy.

PULMONARY REHABILITATION - Our services include oxygen and respiratory therapies, CPAP, intravenous medication, skilled nursing care and exercise programs.

- Swallowing Therapy
- Total Joint Replacement
- Wound Care

TeliStat™ Restorative Care Unit

The TRCU delivery model was developed by Dr. Anthony Bacchi and provides patients with noninvasive monitoring of their cardiac performance through state-of-the-art telemetry. Patients admitted to the unit are outfitted with portable wifi/cellular cardiac monitors which register the real-time data 24 hours a day, including when they are at therapy. The unit’s state-of-the-art capabilities help limit avoidable hospital readmissions by providing immediate medical intervention and decreasing the chances for adverse outcomes.

Quality Care:

Brookhaven Health Care Facility continuously receives outstanding ratings from the federal and state governments. Learn more at medicare.gov.
